Settlers of the shift is an open map of experts, organizations and ideas that are scattered around the globe. It's for people whose work is shifting us towards a better tomorrow – a New World Order 2.0. This map aims to encourage people to connect across sectors and enable you to tie partnerships with like-minded individuals.

How you wish to use and read the map is up to you. Click on the hyperlinked silhouettes of experts, tagged road pieces and the numbered villages and towns for more particulars in the web. Certain ideas – like hierarchy, debt and control – are a hindrance to development towards NWO 2.0. They've been marked in red. Otherwise the green tags are positive signs, weak signals, that can take us forward.

- Six values are suggested as a common backbone for the partnerships:
- **Justice:** fair and honest treatment of everyone involved
 - **Co-creation:** synergistic dialogue and collaboration
 - **Meaningfulness:** solutions to problems worth solving
 - **Generosity:** giving time and resources for the sake of giving
 - **Dignity:** acting in a respectful and ethical manner
 - **Abundance:** denying artificial scarcity and limitations
